

THE FUTURE IS CLOUD

WHO IS IN THE CLOUD?

According to Right Scale's annual State of the Cloud Report for 2019, 91% of businesses used public cloud and 72% used a private one.

Working from home has allowed companies to stay productive and efficient. By 2028, one study estimates that 73% of all departments will have remote workers.

Studies show employers offering at least part-time telecommuting flexibility collectively save \$44 billion each year.

THE "NEW NORMAL"

WHERE IS IT GOING?

The global public cloud services market is expected to grow 17 per cent in 2020. This will see it reach a value of \$266.4 billion, up from \$227.8 billion in 2019.
